

# Winking Skeleton Craft

*This clever Skeleton winks like magic. Kids are always impressed by this simple optical illusion that tricks the eye and makes the skeleton wink. This easy to make Halloween kid's craft is perfect as a Halloween party favor or activity. Don't forget to check out our other Kidfunideas Halloween projects too at: [www.Kidfunideas.com](http://www.Kidfunideas.com)*

## What you'll need:

- Corrugated cardboard
- Rounded lollypop stick
- Glue Stick
- Scissors
- Skeleton face printout

## How to make it:

1. Print out the Skeleton faces. You will need both faces to do this project.
2. Cut out a piece of corrugated cardboard the same size as the boarder around the skeletons in such a way that the openings in the cardboard are at the base and top of your skeleton.
3. Insert your lollypop stick into one of the holes in the center of the cardboard about 2 inches.
4. Trim out your skeleton faces.
5. Paste one skeleton on each side of the cardboard, lining them up.

To work this trick, put the stick between your palms and spin the picture. Look at your skeleton and the face seems to change right before your eyes – wink, wink!
